

LongLongRollingAverage
::getPackagedValues

```
graph LR; A[LongLongRollingAverage::getPackagedValues] --> B[LongLongRollingAverage::max]; B --> B
```

The diagram illustrates a call relationship between two components. On the left, a white rectangular box contains the text "LongLongRollingAverage ::getPackagedValues". A blue arrow points from this box to a larger gray rectangular box on the right. This gray box contains the text "LongLongRollingAverage::max". A second blue arrow originates from the bottom right corner of the "max" box and loops back to its own top edge, forming a curved self-loop.
